JOIN US THIS OCTOBER

The Cornea Research Foundation of America is embarking on an ambitious research path that has the potential to dramatically change the way we approach vision correction, transplant treatments, management of those with complicated glaucoma problems and more.

One of our high-priority strategic initiatives is to provide relevant, up-to-date information to both patients and doctors on the latest advancements in treatment options. Through assisting in training doctors like you who are dedicated to improving patient care and visual outcomes we meet this goal. View a complete list of our research areas at Cornea.org.

3:00pm—Afternoon Break/Networking
4:00pm—Seminar Adjourns & Guests Depart

SPEAKERS AND TOPICS

Francis W. Price, Jr., M.D.
Glaucoma Management with Corneal Surgeries: Steroids are often used to prevent rejection in corneal surgeries but can raise eye pressure. Patients that have pre-existing glaucoma can be hard to manage while on steroids. In this talk, a flow sheet on glaucoma management with and without steroid use will be covered. (1 hr IOB/OLDPAC)*

Ramana Moorthy, M.D.
The Wide World of Retina: Are you comfortable with your retinal exam? This course will review the most common retina issues such as macular degeneration, diabetic retinopathy and tears/detachments. How to do a proper retinal exam, treatment plans, when to observe and when to refer will be covered. (1 hr OLDpac/IOB)*

Nathan Lighthizer, OD
ERG, mERG, pERG, EOG, VEP Electrodiagnostics Alphabet Soup:
Electrodiagnostics can be a confusing, intimidating area in optometry. VEP, ERG, mERG, pERG and EOG are often the key to diagnosis and prognosis of a number of inherited and acquired conditions. Knowing when to refer can be critical for a patient’s diagnosis and management. (1 hr IOB, COPE #41551-PD)

Michael Sacopulos, J.D.
Top 10 Legal Questions You Need to Know Answers to: Health records are here to stay. Are you in compliance? In this talk, the basic rules and regulations will be covered from HIPAA to e-prescribing to Meaningful use. (1 hr IOB)*

Matthew Feng, MD
Links, Rings and Grafts—Oh My! Options for Keratoconus: Glasses and contacts aren’t the only options for keratoconus any longer. This talk will cover other options including collagen cross-linking, Intacs® and anterior lamellar grafts. (1 hr IOB/OLDPAC, COPE #45267-AS)

Scott Sanders, M.D.
Pupil and Shaky Eyes: Pupil and eye muscle function can tell us a lot in an examination. This lecture will review the most common pupil abnormalities and associated causes. Eye muscle issues such as nystagmus will also be covered. (1 hr IOB)*

Ben Sullivan, PhD
The Etiology & Sequelae of Hyperosmolar Dry Eye: The mechanism of dry eye is driven by hyperosmolarity of the tears and tear film instability. The role of hyperosmolarity will be reviewed and the impact on dry eye and treatment options. (1 hr OLDpac/IOB)*

* COPE pending approval
